

GOLF CART CLUB BAG PROTECTION DEVICE

ABSTRACT

A golf cart club bag protection device having a folding canopy which allows other accessories, such as coolers and sand bottles, to be mounted underneath. The device has four components: a securing frame (1), an attachment bar (22), canopy support bars (2) and (3) and a canopy (4), (5) and (16). The securing frame (1) is shaped so as to have two vertical legs (21) and a horizontal top bar (23) while the attachment bar (22) has a unique shape so as to raise the pivotal point of the device. Tabs (8) are located at the base of the legs (21) wherein the support bars (2) and (3) are pivotally attached to the securing frame (1). The attachment bar (22) has two C-shaped clamps (6) which are used to secure the securing frame (1) to the golf bag support bar (18). The horizontal top bar (23) has a canopy holder (11) which holds the removably attached canopy (4), (5) and (16), a canopy flap (13) and a canopy fastener (15) in order for the user to keep the golf cart club bag protection device in an upright position.
